Servei de Biblioteques UAB
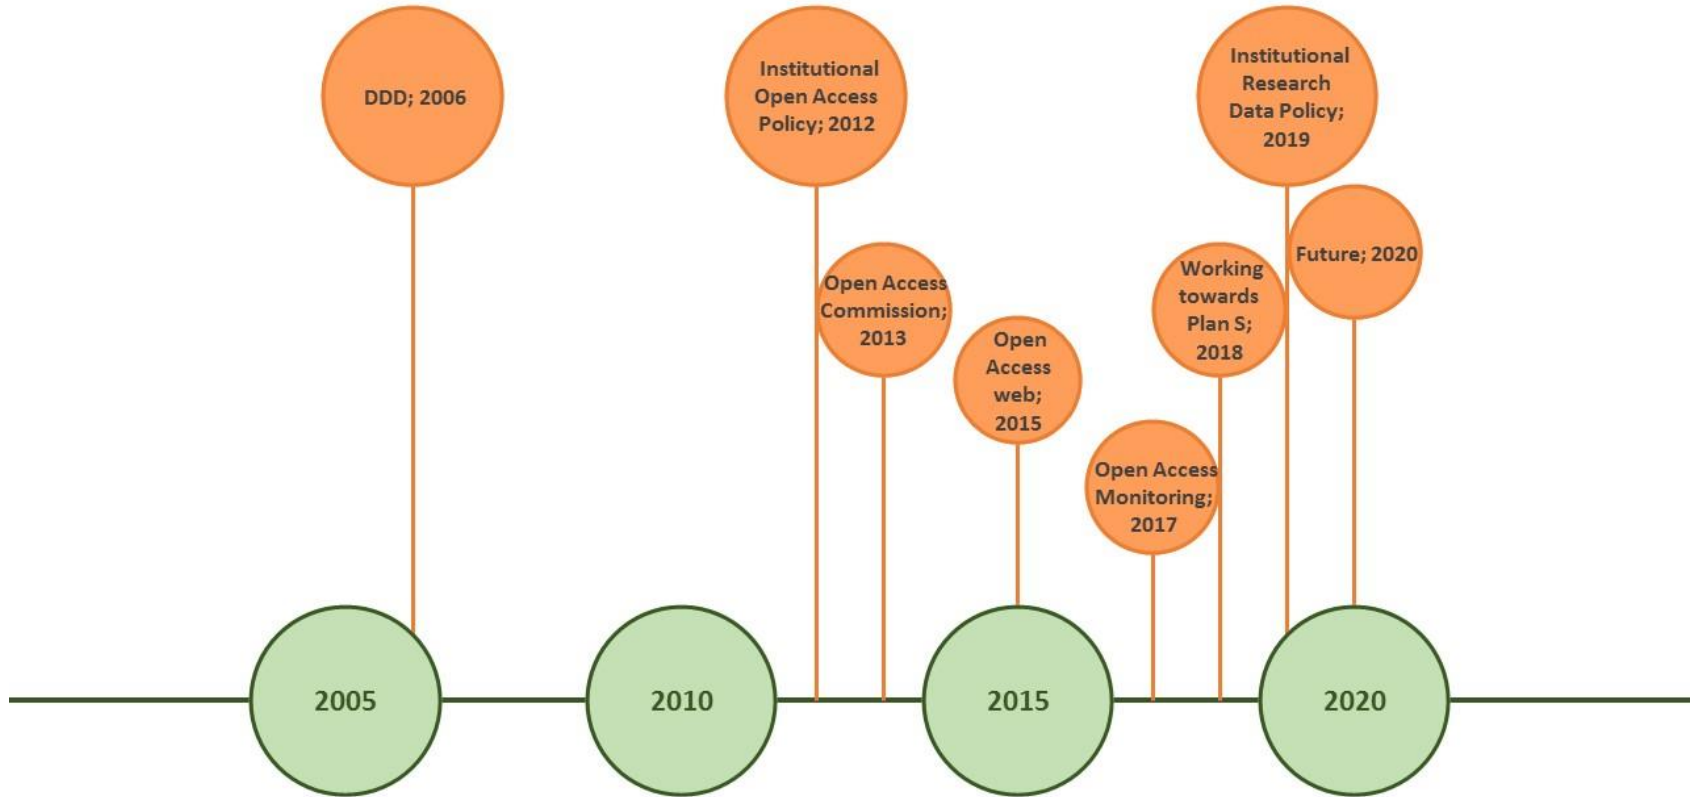

Open Access at UAB

2005   0 documents

2019   over 82,000 research documents available

Contents

DDD

- UAB Institutional Repository

- Nearly 200,000 records

- Heritage, research and institutional documentation

- Collection management by Library Service

- UAB research groups'/centres' customised collections

- Open access granted

- Publishers' policies "taken into account"

- Well positioned in rankings

- Digital Preservation Policy

Institutional Open Access Policy

- Drawn up by the Library Service and approved by the Governing Council

- For academic-research staff and students.

- Academic and scientific publications and educational resources.

Open Access Commission

Stakeholders:

- Vice-Rector for Research and Transfer
- Vice-Rector for Institutional Relations and Culture
- Rector's Commissioner for ICT
- Deputy Executive Administrator for Research
- Information and Communications Technologies Manager
- Publishing Service Director
- Library Services Director
- Teaching and Research Staff members
- Library Service members
- Members of Research Management Area

**The Action Plan for Open Access at the UAB:**

The plan is the Commission's roadmap detailing the actions to perform at UAB to promote open access

Highlighted Actions:

- ORCID at the UAB
- CC licenses recommendations
- UAB open access journals
- CRIS-UAB connected to DDD
- DDD self-archiving forms
- Intellectual Property and Open Access Information Platform

# Institutional Open Access web

Scientific output in Open Access

Gathers together all information about OA:

advantages, legal framework, funding for publication, good practices, OA data, funding agencies, etc.
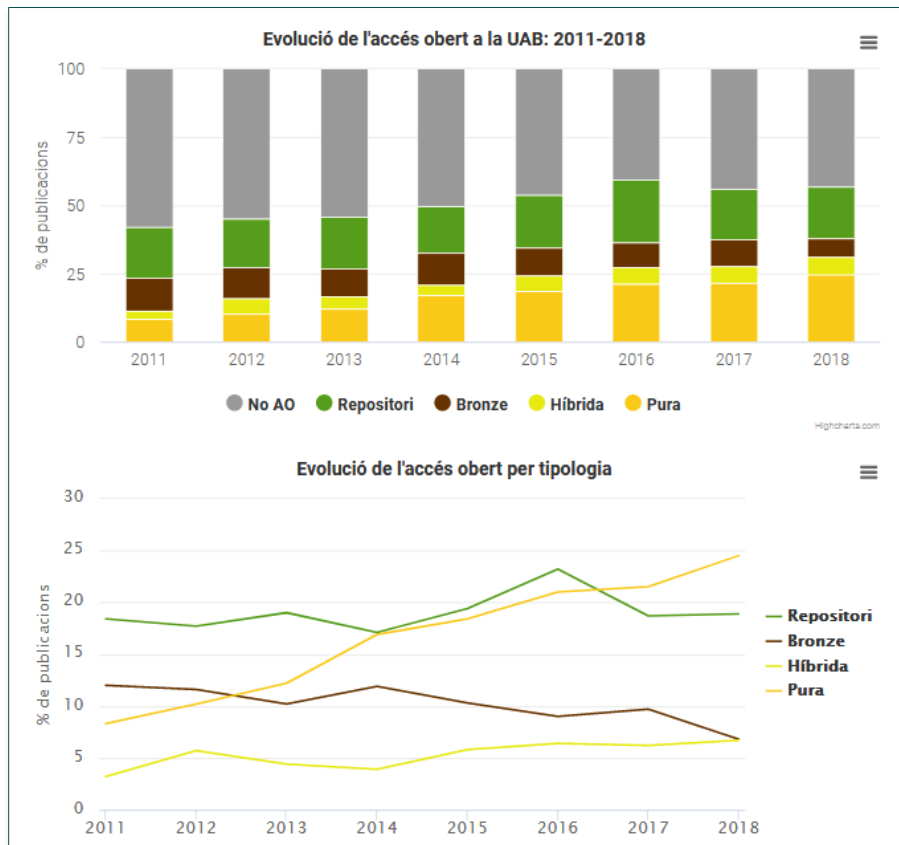

http://www.uab.cat/open-access

Open access monitoring

82,827
Research papers

10,643
Articles in UAB Research Database

80
UAB scientific journals

73
Research groups and centres in DDD

Publication type

- Published articles
- Book chapters
- Studies
- Meetings and congresses
- Books
- Preprints
- Doctoral theses
- Datasets
- Projects reports
- Data management plans
- Bachelor's degree final project
- Dissertations
- Working papers

Open Research Thermometer

Open access monitoring

OA Observatory

Working towards **Plan S**

1. **All publications under a CC license**

All UAB journals are published under CC licenses. UAB Publishing Service encourages use of the CC-BY license, in line with the Budapest Open Access initiative

UAB CC licenses recommendations

4. **Publication fees covered by funders or research institutions.**

Financial aid thanks to bonuses and discounts on APC prices with membership fee: MDPI, RSC...

Working towards **Plan S**

6. **Aligned strategies, policies and practices of all stakeholders**

The Strategic plan of the Library Service (2019-2022), within the framework of the 2018-2030 UAB Strategic Plan, sets two main objectives in this regard.

- Make progress in the open science field.

- Contribute actively to spotlighting all scientific output.

The DDD has been implementing quality improvements according to the needs that arise (eg: hosting datasets and DMP) and Plan S criteria established.

Plan S and repositories

Mandatory criteria for compliance

PIDs for deposited versions of publications	✅
High quality article metadata / non proprietary format / CC0	✅
Machine readable information on the OA status and license in the article	✅
Continuous availability (uptime at least 99.7%)	✅
Helpdesk	✅

Plan S and repositories

Strongly recommended additional criteria for compliance

|	
Manuscript submission system: individual and bulk uploads	✅
Full text stored in a machine-readable community standard format	✅
Support for PIDs for authors, funders...	✅
Openly accessible data on citations in accordance with the standards set by the Initiative for Open Citations (I4OC)	❌
Open API to allow others to access the content	✅
OpenAIRE compliance of the metadata	✅
Link with authoritative bibliographic metadata from third party systems: PubMed, Crossref, Scopus…	✅

Institutional Research Data Policy

- **Written by all stakeholders**

- **This policy will address the following points:**

  - Who is affected

  - Intellectual property (or Copyright issues)

  - FAIR principles

  - Technical issues of publication: DOI for datasets, mandatory ORCID for authors, open licenses...

  - Stakeholders' responsibilities

  - Preservation period

  - Review of the policy

Contents

Future

- Approve the Institutional Open Access Research Data Policy

- Transform the current Institutional Open Access Policy into an Institutional Open Science Policy.

- Open Access Board → Open Science Board, and extension of new fields

- Improve the interconnection CRIS-DDD

- More financial incentives in the UAB, regarding:

  1. researchers (Phd students included) publishing in Open Access journals (Gold route)

  2. new open access memberships

- Set reward systems to deposit articles post-prints to DDD

- Negotiate, with our Consortia, transformative subscriptions with publishers

Thank you!
